ARENA DRAG

Engineered Efficiency and Proven Quality. Arena Drag is designed to pull behind ATVs, UTVs, Garden and Compact Tractors. The swept tine design enables the Arena Drag to be an aggressive groomer for sandy and sandy-loam arena conditions. Three linear surfaces engage when in use, two harrow tine bars and a Rear Arena Comb. These elements work together floating and levelling your footing, leaving a quality finish. The Result: A consistent, level arena every use.

Ride Hard ... Stay Grounded!

Affordable - Effective - Efficient Arena and Track Grooming Maintenance

ARENA DRAG

Features

- The Conterra Arena Drag is designed to be pulled with an ATV, UTV, Garden or Compact Tractor.
- For use in sand and sandy-loam arena conditions.
- Tines are on 3" centers for optimal grooming coverage as each tine breaks new ground.
- Tines are swept forward to increase the cutting force of the Drag compared to the standard harrow.
- Three linear surfaces for premier grooming action, two rows of Harrow Tines with a Rear Arena Comb creating a clean finish.
- Rear Arena Combs creates a smooth and level surface for your arena footing.
- One - 6" Arena Combs - one front and one rear - are cut from 3/16" steel plate and are easily replaceable.
- Harrow Tines are 5/8" x 7.5" long hardened steel spikes and are easily replaced.
- Frame is constructed from laser cut 3/16" steel plate for years of dependable service.
- Comes with tow chain, a clevis hitch and pin and a ball hitch for easy connection to pull vehicle.
- Available in a 48" width.
- Black Powder Coat finish.

Swept tines help the Drag maintain contact with the ground, reducing the bounce

Rear Arena Comb and Two Harrow Tine Bars.
